## From Scribus Public Wiki

### Welcome to the Scribus Wiki

Scribus is an open source DTP application for Linux and other flavors of Unix and Unix-like systems, including Mac OS X , OS/2 and eComStation respectively, and Windows. The Scribus Wiki has been created in order to give users a place to put HOWTOs, tips and hints on using Scribus and DTP.

The documentation available here has been contributed by Scribus users for Scribus users and is not authorised by the Scribus team – for official documentation please see the Scribus Online Documentation

Other languages:  Čeština –  Deutsch (de) –  Español (es) –  Français (fr) –  Nederlands (nl) –  Polski (pl) –  Português (pt\_BR) –  Русский

### Scribus: The Official Manual is available for order and shipping!

Our own comprehensive manual, detailing everything you need to know to get started and use Scribus is now shipping. The list price is set at £29.99, and it is available from Amazon and other online booksellers. At least for the foreseeable future, we must recommend against buying directly from the publisher (FLES Books), which is due to various technical problems.

**Scribus newbies** may enjoy starting with our Get Started with Scribus tutorial.

Here is an **Index** which may also be of some help as you have questions about usage or are looking for hints about how to accomplish a particular task.

**Has Scribus served you well this year? Be sure to describe your successful project in our Success stories!**

**Please see Your first Scribus Wiki article for information on account creation.**

### Scribus 1.3.3.x/1.3.5+ and beyond

- **Stable version: 1.3.3.14**
- **Development version: 1.3.7**
- **Win32 version |**

### Coming events [edit]

LGM 2010 will be held in Brussels, Belgium, May 26–29, 2010.

### News

**Scribus 1.3.3.14** has been released!

**Scribus 1.3.7 has been released!**

### Getting Started with the Wiki

Please see MediaWiki User's Guide for wiki usage.
